### **DETAILED ACTION**

1. This office action is in response to the Application filed on September 29<sup>th</sup>, 2004. Claims 1-55 are now pending in the application.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claims 1-8, 13, 17-26, 35-44, and 53-54, drawn to connection set-up which based on traffic contract with bandwidth requirement, classified in class 370, subclass 395.21.

Group II, claims 9-12, 14-16, 27-34, 45-52, and 55, drawn to distributing information via time channels with priority resolution, classified in class 370, subclass 444.

3. Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, subcombination of Group II has separate utility such as “priority utilization period with priority in its own frame period” compared to Group I whose utility is “guaranteed bandwidth period” and “notification” for indicating setting of bandwidth guaranteed period. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications (370/395.21 vs. 370/444);

Art Unit: 2616

and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Jay H. Maioli on March 14<sup>th</sup>, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143).

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
